

1. Authentication & Configuration

PARAMETER	VALUE	DETAILS
Production Webhook URL	https://olivialms.cloud/api/webhook/inbound-leads	HTTP POST (JSON)
API Key Header	x-api-key: 87566494dedd723cea257b4a4489b2053a1927d6dc5a16572300103d1f8a4cad	Include in HTTP headers
Content-Type	application/json	Raw JSON body

⚡ CHANNEL 1: LIVE TRANSFERS DID

19162330004

Transfer live callers & post with "did": "19162330004"

📞 CHANNEL 2: INBOUND CALLS DID

19162330139

Route direct inbound callers & post with "did": "19162330139"

2. Integration Channels & Workflow

⚡ Channel 1: Live Transfer Workflow

DID: 19162330004

1. **Qualification:** Agent/qualification script confirms lead details & qualification criteria.

2. **Data Post:** Your system executes HTTP POST with lead payload and did: "19162330004" .

3. **Call Transfer:** Telephony system transfers the live caller to DID 19162330004.

4. **Dashboard:** Automatically populates Jake's ⚡ Live Transfers dashboard view and stats.

📞 Channel 2: Direct Inbound Calls Workflow

DID: 19162330139

1. **Campaign Route:** Direct inbound consumer calls route directly to DID 19162330139.

2. **API Optional:** If form data exists prior to the call, POST to webhook with did: "19162330139" .

3. **Dashboard:** Automatically aggregates in Jake's 📞 Inbound Calls dashboard view and stats.

3. JSON Payload Fields

FIELD	TYPE	STATUS	DESCRIPTION / EXAMPLES
phone	String	REQUIRED	10-digit consumer phone number (e.g. "9165550101" or "+19165550101")
firstName	String	Optional	Consumer's first name (e.g. "Samantha")
lastName	String	Optional	Consumer's last name (e.g. "Jenkins")
name	String	Optional	Full name (if first and last are combined)
email	String	Optional	Email address (e.g. "samantha.j@example.com")
totalDebtAmount	Number / String	Optional	Total unsecured debt (e.g. 28500 or "\$28,500")
did	String	Recommended	Target DID: "19162330004" (Live Transfer) or "19162330139" (Inbound)
trafficType	String	Optional	"live-transfer" or "inbound-call"
city , state , zipCode	String	Optional	Address components (e.g. "Sacramento", "CA", "95814")
notes	String	Optional	Qualification summary, credit cards, or agent remarks
smsOptIn	Boolean	Optional	true or false indicating consumer SMS consent

4. Implementation Code Examples

cURL Command (Live Transfer Payload):

```
curl -X POST https://olivialms.cloud/api/webhook/inbound-leads \
-H "Content-Type: application/json" \
-H "x-api-key: 87566494dedd723cea257b4a4489b2053a1927d6dc5a16572300103d1f8a4cad" \
-d '{
  "firstName": "Samantha", "lastName": "Jenkins", "phone": "9165550101",
  "email": "samantha.jenkins@example.com", "totalDebtAmount": 34000,
  "city": "Sacramento", "state": "CA", "zipCode": "95814",
  "did": "19162330004", "trafficType": "live-transfer", "smsOptIn": true
}'
```

Node.js (Axios Client):

```
const axios = require('axios');

async function sendLiveTransfer(leadData) {
  try {
    const response = await axios.post('https://olivialms.cloud/api/webhook/inbound-leads', leadData, {
      headers: {
        'Content-Type': 'application/json',
        'x-api-key': '87566494dedd723cea257b4a4489b2053a1927d6dc5a16572300103d1f8a4cad'
      }
    });
    console.log('✅ Lead ingested successfully:', response.data);
  } catch (err) {
    console.error('❌ Error posting lead:', err.response?.data || err.message);
  }
}
```

Python (Requests):

```
import requests

payload = {
  "firstName": "Natalie", "lastName": "Bennett", "phone": "9165551002",
  "email": "natalie.bennett@example.com", "totalDebtAmount": 21500,
  "city": "Roseville", "state": "CA", "zipCode": "95661",
  "did": "19162330139", "trafficType": "inbound-call", "smsOptIn": True
}

headers = {
  "Content-Type": "application/json",
  "x-api-key": "87566494dedd723cea257b4a4489b2053a1927d6dc5a16572300103d1f8a4cad"
}

res = requests.post("https://olivialms.cloud/api/webhook/inbound-leads", json=payload, headers=headers)
print("Status:", res.status_code, res.json())
```

5. Server Responses & Troubleshooting

HTTP STATUS	MEANING	RESOLUTION / ACTION
201 Created	Success	Lead received and queued for automatic segregation into Jake's dashboard.
401 Unauthorized	Invalid API Key	Verify that the x-api-key header matches your assigned key.
400 Bad Request	Invalid Phone / Payload	Ensure the phone number is provided and contains valid 10-digit format.
429 Rate Limited	Too Many Requests	Default limit is 100 requests per 15 minutes per IP.
